### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

The inventions are distinct, each from the other because of the following reasons:

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

a. Species A, a process wherein forming the metal second layer and forming the metal third layer comprising: sputtering copper metal second layer over the metal adhesive first layer; and sputtering the metal third layer wherein the metal third layer is selected from a refractory metal, a metal doped refractory metal or a refractory metal alloy. It appears that claims 12-13, 14, 17-19, and 21 are read on species A.

b. Species B, a process wherein forming the metal second layer and forming the metal third layer comprising: sputtering the metal second layer over the metal adhesive first layer wherein the metal third layer is selected from a refractory metal, a metal-doped refractory metal or a refractory metal alloy and sputtering the metal third layer wherein the metal third layer is selected from a refractory metal, a metal doped refractory metal or a refractory metal alloy; and sputtering a copper third layer over the metal second layer. It appears that claims 12-13, 15, 17-19, and 20 are read on species B.

c. Species C, a process wherein forming the metal second layer and forming the metal third layer comprising: sputtering a copper metal second layer over the metal adhesion first layer; and plating a copper stud through a mask that is

Art Unit: 2813

disposed over the second metal layer. It appears that claims 12-13, 16, 17-19, and 22 are read on species C.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2813

2. A telephone call was made to Micheal Bernadicou on 07/28/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanhha Pham whose telephone number is (571) 272-1696. The examiner can normally be reached on Monday and Thursday 9:00AM - 9:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Whitehead can be reached on (571) 272-1702. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
